EXPERIENCE

TEKION CORP | SOFTWARE DEVELOPMENT ENGINEER

July 2022 – Present | Bangalore

Tech Stack: ReactJS, Redux, Html, Css, Antd, JavaScript, pdf, Error handling.

- Developed the **Digital Finance Engine** project from scratch, an automated platform for the submission of credit applications, lender selection, and decision callback process.
- Integrated the above with **ARC(Automotive Retail Cloud)** with the status of **250+** dealers already onboarded **increasing** revenue and **reducing** operational costs by **70%**.
- Implemented **Module Federation** for the Sales module, enabling dynamic code sharing and integration across microfrontends.
- Implemented **Virtualisation** on a dynamic form having large data which **reduced load time by 90%** and improved user experience with smooth scrolling and fast data rendering.
- Ensured high **Code quality** by reviewing thousands of lines of code, engaging in design discussions resulting in a scalable and maintainable architecture.

TEKION CORP | SDE INTERN

Jan 2022 – June 2022 | Bangalore

Tech Stack: ReactJS, Redux, Html, Css, Antd, JavaScript, React Router.

- Developed a customized forms tool for Dealer Onboarding using **React Drag and Drop** which replaced a third-party solution and reduced operational costs by **80%** from **\$191** to **\$51** per user.
- Developed the entire login flow for the Dealer Onboarding, incorporating **user authentication, session management, and security measures**. Also built a **dashboard** to visualize the status of various forms.
- Integrated the tool with the **ARC(Automotive retail Cloud)** reducing manual configurations and automating data feeding.
- Enhanced code coverage to over **80%** by setting up and writing comprehensive unit tests using **Jest** and **React Testing Library**.

OPTUM UNITEDHEALTH GROUP | SDE INTERN

June 2021 – Aug 2021 | Hyderabad

Tech Stack: Angular, bootstrap, JWT, Session Management, HttpClient.

- Led the development of a comprehensive test automation platform, **ETAAS (Enterprise Test Automation as a service)**, providing UI checks, API validation, and performance testing services under a unified platform.
- Streamlined the onboarding process allowing users to create projects and test cases directly through the UI, **reducing** manual testing efforts by **40%**.
- Integrated tools like **Selenium, RestAssured, SauceLabs, and Zap** for the end-to-end automated testing.
- Collaborated in an **Agile Scrum** environment, managing project code using GitHub workflows.

PROJECTS

Impact of weather on COVID-19 | Python, Plotly, Scikit

- Built a system to investigate the impact of weather indicators such as Temperature, Relative Humidity, and Wind Velocity on COVID-19 incidences. Parallel processing and large-scale graph processing are used.

Real time Face Detection | Python, OpenCV, Jupyter

- Implemented the project using an optimized LBPH algorithm with high accuracy and efficiency in identifying facial features.

EDUCATION

Vellore Institute Of Technology

BACHELOR OF TECHNOLOGY | MAJOR IN COMPUTER SCIENCE | 2018 - 2022

CGPA: 9.31/10

SKILLS

TECHNICAL SKILLS

- ReactJs, Redux, RestAPI, Javascript, Angular, Typescript, Node.js, ES6, CSS, HTML, Webpack, Jest, Git, Jira, Postman.

CONCEPTS

- Object Oriented Programming, Functional Programming, Data Structures and Algorithms, Concurrency and Multithreading, Agile, Scrum, SOLID Principles, MVC Architecture, Responsive Design, Unit Testing

PUBLICATIONS

Sentimental Analysis of Code mixed languages – CIS 2021

Conference: Congress on Intelligent Systems (CIS 2021), Published on July 1, 2022

- Co-authored a research paper focused on the Sentiment Analysis of code-mixed data, addressing the challenges posed by the unstructured nature of code-mixed text, which deviates from traditional structures.
link: Springer Publication

ACHIEVEMENTS

- Received an **appreciation letter** and award from the CEO of SiliconR Infotech, **Mr.J.G.Rajini Kanth**, for our outstanding project work
- Received an **award from the Director** at Tekion for contributing to the **successful Honda launch project**.
- Secured **Rank 2** in the Codalab Competition for our team project submission.
- Achieved **Consolation Prize** in the hackathon.
